## The Recapture Adventure

The Recapture Mining Adventure is the best placer Gold mining adventure available in Utah and certainly one of the best in most of the western states.

Recapture mine is located in the Recapture canyon in San Juan County (Southeast Utah). The gold has originated from the Blue Mountains and has concentrated over many thousands of years in the natural giant sluice box called Recapture Canyon. The gold is plentiful and quite coarse.

The water supply is limited, but is usually adequate for small dredges, high bankers, and the like. We allow our guests to roam the canyon and prospect where ever they wish, but you may have your best luck by working in areas that we direct. We have been here quite a while and have discovered most of the best spots. Metal detecting is also available throughout the area. We are anxious for you to have a great experience and find lots of gold so you will want to return many times.

The Canyon is beautiful and has many attractions besides gold. You may even discover ancient Indian ruins. If you do, please refrain from damaging them in any way. It is a federal offense.

The mine owner may be operating the main commercial operation. The equipment is dangerous, so we ask that you stay clear and watch your children. You are welcome to observe, but we really don't want any help. Our insurance does not cover you if you get hurt. We do ask that all guests sign a waiver of liability prior to entering the property.

The commercial operation will have a clean up at the end of the day and we will divide the gold with all of the guests of the day. You could go home with more value in gold than the cost of the trip. We guarantee that you will get more than your monies worth in more ways than one.

We will even have a great Dutch Oven meal and picnic at lunchtime for all to enjoy.

Camping is not allowed at the mine site, but around the lake is great camping, swimming, boating, and fishing. For those who wish to stay in motels, etc. The town of Blanding is only 3 miles away and has great accommodations.

Our outing is planned for June 18 & 19. The mine will be closed on Sunday, but there are many other areas you will want to explore or just play and fish in the lake.

The cost is \$100 per prospector per day if you want to share in the commercial operation gold - \$75 per day if you only want to keep the gold you find and not share in the commercial operation gold. If the commercial operation does not run the day that you are there the price is only \$75.

Each morning we open the gate at 7:00 AM and close the gate behind you at 9:00 AM. We cannot monitor the gate all day long so we ask that you always keep the gate closed. The gate will be locked at 7:00 PM.

We have included a map, so be sure to save it.

**Bring the whole family and have the best gold mining adventure of your life at Recapture Gold Mine!!! June 18 & 19. SEE YOU THERE.**

Any questions or comments should be directed to Dan Wolfe. Phone: (mob.) (801) 808-3242

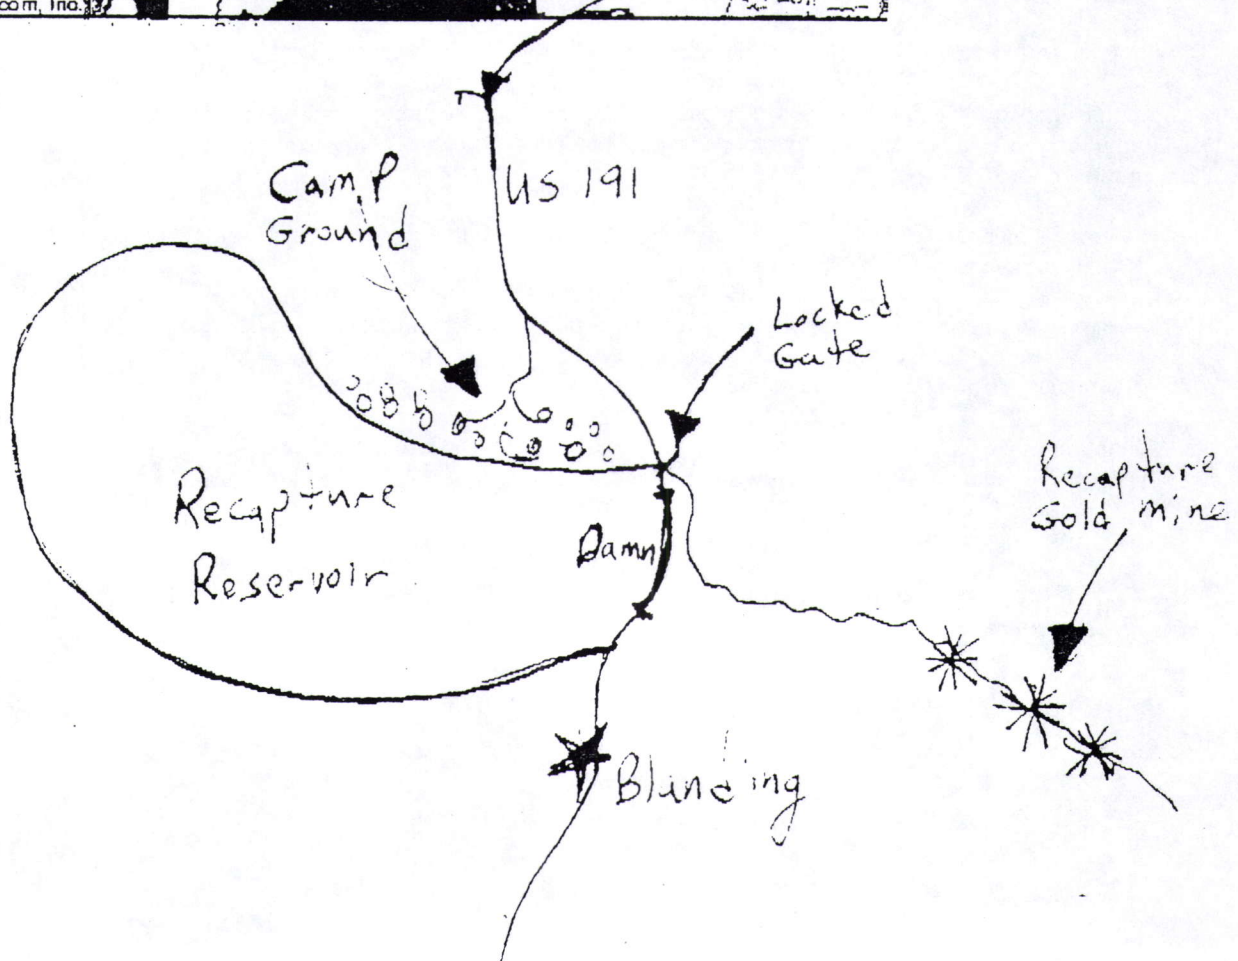

- Go South on I-15 to Price  
Exit at Spanish Fork.
- Go South on US-6 to Price
- Go South on US-6 to US-19
